

Rising Stars in EECS is an intensive workshop that was created to increase awareness among women graduate students, postdocs, and Ph.D holders of future academic careers in electrical engineering, computer science, and artificial intelligence and decision making.

Expanding Participation in Electrical Engineering and Computer Science at MIT

**Electrical
Engineering and
Computer Science**

Prioritizing Building Community and Opportunity

EECS at MIT is engaged in the critical work of building a culture where all members of our community can thrive. Here are some of the initiatives supported by the department that are working to create an inclusive present and future for EECS.

EECS GAAP PROGRAM

The Graduate Application Assistance Program (GAAP) is a student-run initiative within the MIT EECS department. GAAP pairs eligible applicants with current EECS doctoral students to provide graduate school application mentorship. This program is designed to increase and promote access to graduate application support in Electrical Engineering and Computer Science.

THRIVING STARS

Thriving Stars is the Department of EECS's initiative to increase awareness about gender representation among graduate students in computing and information technologies. Learn more at:

<https://www.eecs.mit.edu/community-equity/thriving-stars/>

The MIT Summer Research Program (MSRP) seeks to promote graduate education as a meaningful and attainable goal; broaden perspectives and participation in research and innovation; prepare and recruit talented undergraduates for graduate programs at MIT and beyond. Learn more:
